

AEROLITE / DESIGNED TO BE FORGOTTEN

Lightweight sunglasses specifically designed for women and runners with smaller faces, the Aerolite is directly derived from the Aero model, the reference for trail runners. They offer the same qualities of hold and ventilation, with a rimless shield for even more lightness and a tremendous feeling of freedom. With a photochromic shield, the Aerolite is designed to go further in all conditions.

SPECTRON3+ POLYCARBONATE

Spectron 3 +

- > protection category: 3
- > Flash coating: improves visible light filtering with mirror effect lenses. It reflects the rays of light and increases the filter effect.
- // Light yet offers good shock resistance, is multipurpose and suitable for all types of activity.

Zebra Light

FROM DAWN TO DUSK

- > The photochromic lens gets darker or lighter in accordance with light intensity. Protection category 1 to 3. Fast activation speed.
- > Exceptional anti-fog coating: no condensation, maximum longevity.
- > Hydrophobic coating on the outside: prevents marking and facilitates the removal of water.
- > Soft material: less risk of injury during falls.
- > Brown: accentuates relief.
- // Recommended for trail running, mountain biking, etc.
