

ELARA / THE SUPER-CHIC GOGGLE

With Elara, Julbo has created a goggle for women who want the best of technology but also like to maximise their style both on and off the slopes. Great-looking with dedicated metal parts and a cat's eye design, it won't let you down when it comes to top-quality performance. Fitted with a spherical and ventilated lens, and available with 4 Julbo technical lenses (Zebra, Zebra Light, SnowTiger, Cameleon), it offers a wide field of vision and the prospect of superbly comfortable days on all types of terrain.

- Full silicone strap
- Symetrical ajustement
- Anatomic frame
- Dual Soft Foam
- Air Flow

ELARA

TECHNICAL FEATURES

- 

Ventilated lens
Additional ventilation via the lens to prevent any fogging.
- 

Anti-fog coating
- 

Extended Outrigger
15 mm extension on each side of the goggles to adapt to all helmets & for homogeneous hold.
- 

Full silicone strap
Dual silicone strap to facilitate goggle hold all the way round the helmet
- 

Symetrical adjustement
Two loops either side of the strap for symmetrical adjustment in the blink of an eye.
- 

Anatomic frame
Cuts on the frame for more flexibility.
- 

Dual Soft Foam
Two layers of foam for optimum comfort and shock absorption.
- 

Air Flow
Integrated air flow in lenses, preventing fogging.

Camel

PURE ALL-TERRAIN VISION

- > Photochromic (category 2 to 4).
 - > Polarizing: eliminates glare for better reading of relief.
 - > Brown color: protection and contrast enhancement.
- // A product of Julbo's high mountain expertise, the Cameleon lens is the absolute weapon of freeriders, allowing them to outsmart any obstacle. Photochromic and polarizing, it protects the user from aggressive high altitude sun and adapts to reduced visibility when required.

ZEBRA | 2
PHOTOCHROMIC | 4

Zebra

OUT OF THE SHADOWS INTO THE LIGHT

- > Wide photochromic range (category 2 to 4)
 - > Fast activation speed: changes from category 2 to 4 in 22 seconds.
 - > Gold color: excellent light receptivity and protection.
- // This lens has become an essential piece of kit for all-terrain riders. Its recognised photochromic properties make for excellent versatility. It adapts to all light conditions with amazing speed, coping with overcast skies and the brightest days.

SNOWTIGER | 2
PHOTOCHROMIC & GLARE CONTROL | 3

Snow Tiger

EXCELLENT VISUAL COMFORT

- > Photochromic (category 2 to 3)
- > Glare Control filter: for better reading of the terrain
- > Orange tint: improved contrast

ZEBRA LIGHT | 1
PHOTOCHROMIC | 3

Zebra Light

FROM DAWN TO DUSK

- > Photochromic (category 1 to 3).
 - > Yellow color: increased light receptivity.
- // Zebra Light is the ideal companion for backcountry riders who can't wait to get on their boards whatever the weather! With an ultra-clear base tint, it's a match for the worst conditions. And the wide photochromic range also means it's fully at ease under both overcast and clear skies.
